                                             'location.
                                             'location.
                                             'location.

print(dumps(query1, indent=2))
```

```
[
  {
    "location": {
      "address": {
        "street1": "162 Santilli Hwy",

    {"$group": {"_id": "$location.address.state", "count": {"$sum": 1}}},
    {"$sort": {"_id": 1}}
])

print(dumps(query2, indent=2))
```

```
[
  {
    "_id": "AK",
    "count": 4
  },
  {
    "_id": "AL",
    "count": 19
